## ARIETTA 850 FF ENDO & EG-580UT

Carving Imaging makes it possible to render clear Ultrasound images from superficial to the very deepest areas. The **ARIETTA 850 Diagnostic Ultrasound System** is equipped with various diagnostic applications such as Real-time Tissue Elastography (RTE), which uses color to express variations in tissue elasticity.

ARIETTA is compatible with the **EG-580UT**, a ultrasonic endoscope, allowing easy access to targeted areas with a small bending radius and short rigid section.
